Sub Category

Subject Are the ICDs Binding "Design" Documents?

Description of Problem or Suggestion:

According to the document introduction, the ICDs are not binding. If this is true, what is the interface design based on?

Originator's Recommendation

The ECS development contractor needs to clarify how the ICDs are being used in the development process and at what point they will be considered "binding."

HAIS Response Date 4/25/95

The CSMS Requirements Specification (304-CD-003-001) will be updated to reflect that the IRDs defines the interface requirements. ICDs are in deed "binding" since the ICDs define how the interfaces are to be implemented in the the design specification (DID 305).
